

PROJECT VITALIZE

CITI-YMCA YOUTH FOR CAUSES

Hi, we are Project Vitalize, a group of Secondary Four students from Hwa Chong Institution! We signed up for the Citi-YMCA Youth for Causes, choosing to raise funds and conduct outreach projects for Diabetes Singapore (DS). With the national War on Diabetes now at the forefront, we felt galvanised to chip in and help fight the war together with DS.

The project has been an eye opener for the four of us. Conceptualising and implementing have taught us empathy, deliberation and foresight, life skills which we cherish and hope will help us face future challenges in life. In our interactions with the DS Support Group members, they have imparted precious knowledge to manage our health well, whether we have diabetes or not. We realise we should never take our health for granted.

We held the finale fundraising concert, with the aim of bringing patients and the public together, believing that other like-minded youths can enjoy the concert and at the same time learn from our experience and be moved to take up worthy causes. The success of the concert has indeed proven that!

Thank you, Diabetes Singapore!

Diabetes Patients needed for Clinical Research...

We are looking for diabetes patients for clinical trials.

To be eligible, you must be:

- Male or post-menopausal female
- Age 21 to 70 years
- Diabetes controlled by diet alone or on a single medicine (metformin)
- Not suffering from any severe medical conditions
- Willing to take study medication
- Able to commit for overnight stays

Eligible participants will be invited for a health screening, including lab tests at no cost. You will be reimbursed for time and transport.

If you are interested please contact our Clinical Research Unit at:

Telephone : 6413-9930
Contact time: 9am – 5pm
(Monday to Friday ONLY)
